Complete assessment of the organs was completed within 30 minutes of death from cardiorespiratory failure. Assessment of the heart, liver, kidneys, lungs and pancreas was performed. Patient has been identified as an organ donor.

HEART: extensive tissue necrosis  
LIVER: normal, procured for transplant  
KIDNEYS: normal, procured for transplant  
LUNGS: extensive swelling and bronchospasm was noted prior to procurement  
PANCREAS: normal, procured for transplant

Viability of kidneys, liver, and pancreas was noted and transplant candidates were identified within 1 hour of time of death.
